

## Make your own SHINE jar!

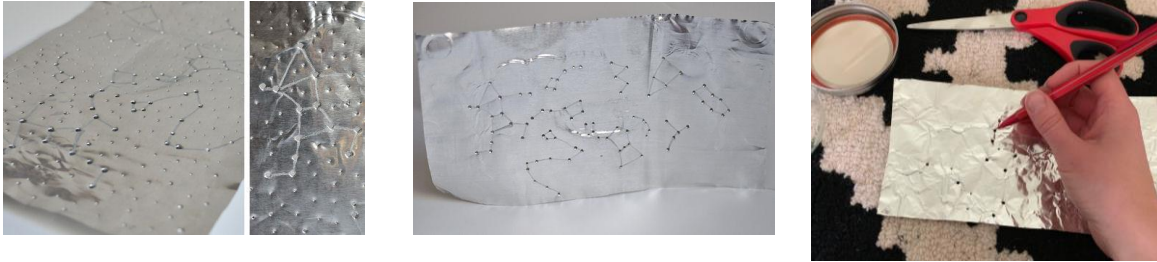

### Constellation Mason jar materials:

- Jar
- pen or sharp pencil
- Thick rug or carpet to work on
- Strip of aluminum foil long enough to fit around inside the jar and tall enough to reach to the very top of the jar.
- Small tea light (battery powered)

## HOW TO:

1. Poke holes in the aluminum foil in the shape of a constellation. Make sure you have a soft surface to work on so the pencil can poke through.

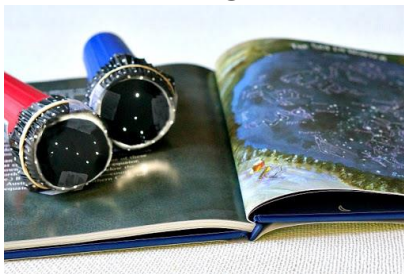

2. Fill in the other space with more holes. Make the holes smaller than the ones used to make the constellations because it will set the constellations apart.
3. Roll up the foil into a circle and slip it into the jar.
4. Insert an illuminated tea light.

5. Close the top.
6. Take into a dark room and enjoy your very own constellation jar.
