

Create your Own Board Game!

The Riot Brothers love to make up games to make their daily lives a little more interesting. Now you can too! In this project you will design your own board game. Once it's finished, invite your family to play!

Choose a topic: Choose a theme (summer, math, polka dots, animals, anything) to center your game around.

Contents and set up: Create the game board and all of its pieces needed to play.

Define the game goal: How do you win? Do you have to answer a certain set of questions? Do you have to get around the game board more than one time?

How do you play: How is the game set up? What are the rules to play the game? How does your game get scored? How is a winner defined?
