### A. Toilet Paper Roll Animals

#### Materials List:

Toilet paper tube

Pencil

Eraser

#### Optional materials:

Paint

Markers

Crayons

Construction paper

Glue

Scissors

First find a toilet paper roll.

Then figure out what animal you would like to create! You can always do more than one if you have extra materials.

Start by drawing the shapes to make your animals face onto the toilet paper roll. Use a marker or other drawing utensil to trace the lines you drew.

You can use markers, colored pencils, crayons or even paint to add detail and color to your animal. You can use scissors to cut around the head or you can gently press the two sides of the same into themselves to close it up and use those points for ears, horns, and feathers. If you have construction paper and glue you can add extras such as ears, noses, wings or tails. If you want some colored paper and don't have any, you could always use white paper and color it the color you need!

This image just shows more animals you can make. You can also use them as puppets!

(These are the samples I put together)
